ILT Research System - Functional Requirements Specification (FRS v3.4 - English)

Functional Requirements Specification Updated Edition: Wacom DTH-A116 240Hz Hardware Alignment, 6-Digit PIN Standardization, Privacy by Default, and Warm-Up Advancement Rules (Consolidated Edition)

Document Parameter	Specification Value	Document Parameter	Specification Value
Document Identifier:	ILT-FRS-V3.4-EN	Publication Date:	October 22, 2026
Previous Baseline:	FRS v3.3	Target Digitizer:	Wacom MovinkPad 11 (DTH-A116)
Pairing PIN Length:	6 Digits (Aligned with Architecture & DDD)	Video Default Policy:	Disabled (DEFAULT FALSE, Consent Required)
Warm-Up Protocol:	3 Practice Items + 1 Valid Row of 5 Houses	Timer Governance:	20s Defaults (Director Authorization Only)

1. Core Functional Updates in FRS v3.4 (Consolidated Gap Resolution)

- **Pairing PIN Length Standardization (O4, O6):** Standardized pairing code length to 6 digits across all documents.
- **Child Privacy & Video Recording Default (P1, O6):** Video recording is disabled by default (DEFAULT FALSE) requiring explicit parental consent.
- **Warm-Up Advancement Rule (C6, O6):** Harmonized warm-up rule: 3 practice items for sensory familiarization + 1 valid row of 5 houses completed without timeout.
- **Hardware Calibration & Digitizer Rate (D1, D3):** Aligned with DTH-A116 240Hz sampling rate and 5.195 px/mm geometric calibration.
